In the original publication [1], there was a mistake in Figure 5 as published. In panel A, the ROC curve for miR-34a was inadvertently mis-selected; however, the AUC value shown in the plot remains unchanged. The corrected Figure 5 appears below. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

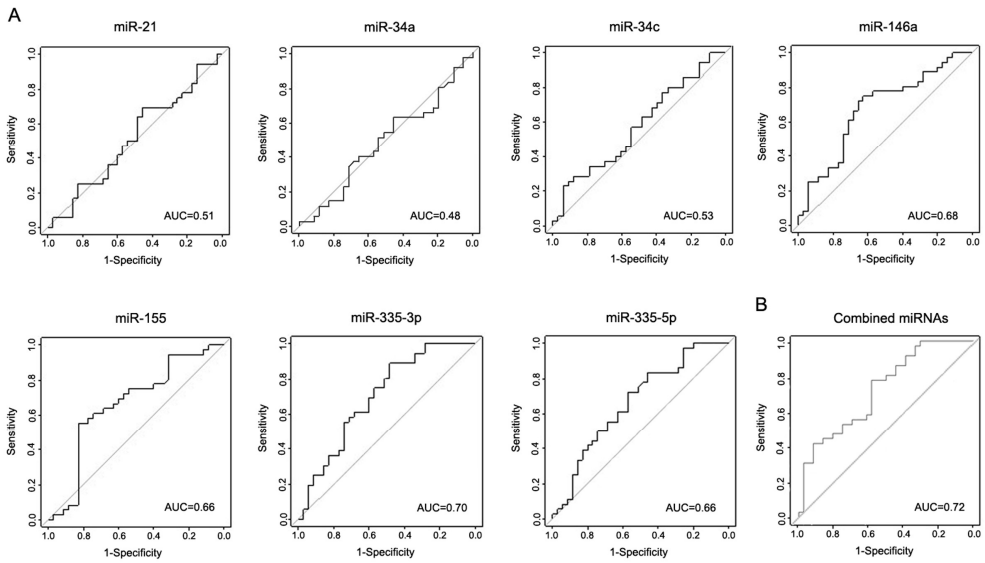

Figure 5. (**A**) ROC curves of combined miRNAs in discovery and validation cohorts, discriminating between controls and iPD patients. (**B**) ROC curves of models created from binary logistic regression to improve discrimination between the two groups. AUC values are indicated in each plot.
