The Journal retracts the article "*Tetragonia tetragonioides* Protected against Memory Dysfunction by Elevating Hippocampal Amyloid-β Deposition through Potentiating Insulin Signaling and Altering Gut Microbiome Composition" [1] cited above.

Following publication, concerns were brought to the attention of the Editorial Office regarding the integrity of an image within this article.

In accordance with the journal's standard procedures, the Editorial Office and Editorial Board conducted an investigation that identified indications of inappropriate image editing and image duplication within Figure 4 presented within this publication. Although the authors cooperated during the investigation, the Editorial Board concluded that the explanations and the supporting materials provided could not satisfactorily readdress the identified concerns.

Consequently, the Editorial Board has lost confidence in the reliability of the findings and decided to retract this publication, as per MDPI's retraction policy.

This retraction was approved by the Editor-in-Chief of the *International Journal of Molecular Sciences*.

The authors have been informed of this retraction. Dr. Sunmin Park agreed with the retraction and other authors did not provide a comment on this decision.
